CAREER OBJECTIVE

A detail-oriented individual interested in a profession combining technical proficiency with design skills and research methodologies to formulate meaningful insights, aiming to contribute to innovative and user-centered projects. Motivated to grow and learn from experienced team members.

EDUCATION

California State University, Long Beach
B.S. in Computer Science

2020 - 2024

WORK EXPERIENCE

IVC - Project Specialist, Accessibility and Compliance

Irvine, CA

July 2026 - Current

Assist reviewing and remediating digital materials (word documents, slide decks, PDFs, Canvas Courses) to ensure compliance with accessibility standards and guidelines (WCAG 2.1 AA and ADA Title II).

Apply established accessibility templates, technologies, and best practices to create and revise accessible instructional and administrative materials by identifying accessibility barriers in correlated digital content and support remediation efforts. Used various technologies such as TidyUP, UDOIT, and Pope Tech for Canvas and GrackleDocs, WebAIM Color Contrast Checker, screen readers (Narrator and NVDA) for documents.

Collaborate with project leads and team members to prioritize tasks and meet project deadlines by tracking, documenting, and report progress on assigned accessibility projects to ensure accuracy and timely completion. Communicate with campus departments to request files, clarify content, and provide guidance related to accessibility remediation needs.

Collaborate directly with faculty and staff to provide individualized guidance on understanding and navigating Accessibility compliance and remediation processes.

Assist with compiling and organizing a software database with their respective VPAT (Voluntary Product Accessibility Template) to centralize and streamline the evaluation of digital accessibility compliance for procurement, risk management, and IT governance.

CSULB CUDA - LAEP Student Research Assistant

Long Beach, CA

September 2023 - May 2024

Performed specialized accessibility evaluations for digital materials to ensure proper functionality using accessibility testing tools (WAVE, JAWS, Color Contrast Analyzer, ANDi) and WCAG 2.0.

Collaborated on a research project related to instructional design, examining the use of narration voice in online learning. The research findings will help contribute to design

guidelines for online lectures.

Supported various research studies related to instructional design by creating study materials, overseeing user tests, and participating in studies.

Assisted with evaluating the usability and accessibility of 3 CSULB web pages, observing users performing tasks to find usability issues, identify problems, and gather feedback to improve the design and functionality of the webpages that were detailed in technical reports.

CSULB - UROP Student Research Assistant

Remote

October 2020 - May 2021

Populated a database that provides materials and data on California Ballot Measures (Propositions or Props) for scholars. Historical research and data mining of primary documents were analyzed and evaluated before being added to the database.

Independently made a research poster on Propositions in California regarding privacy rights.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Journey Mapping Micro-Courses and Badge | CCC Accessibility Center and @ONE | August 2026

Completed professional training focused on inclusive online user experiences, identifying accessibility barriers, and mapping the learner/user journey for digital course environments.

Accessible Documents Certificate of Completion | WebAIM | August 2026

Mastered document remediation, WCAG 2.1 conformance, Section 508 compliance, Microsoft Word, PowerPoint, Excel, and Adobe Acrobat Pro.

SKILLS

Research Methods: Qualitative Research (Qualitative Review/Document Analysis), Quantitative Research (Surveys, Data Analysis), Mixed Methods Research (Case Study), Accessibility Testing, Usability Testing, Literature Review

Programming languages: Java, Python, C++, SQL (PostgreSQL, MySQL), HTML, CSS, JavaScript, Kotlin, R

Operating Systems: Windows 10/11

Technologies: BlueJ, IntelliJ IDEA, Pycharm, DataGrip, MongoDB, Android Studio, RStudio, Visual Studio Code, GitHub, Trello, Diagrams.net, Figma, Canva

Proficient with Microsoft Suite and Google Suite
